INFORMATIONS TECHNIQUES / TECHNICAL SPECIFICATIONS / FICHA TECNICA :

Structure :	Sapin massif
Suspension :	Sangles élastiques entrecroisées
Garnissage assise :	Mousse HR 35 kg/m ³
Garnissage dossier :	Mousse bi-densité HR 30 et 21 kg/m ³ , support dos métal vernis poudre époxy et mousse spéciale outdoor Dryfeel
Piètement :	Plastique avec vis galvanisés. Anti-dérapant
Structure:	Solid fir wood
Suspension:	Cross-webbing elastic straps
Seat cushions:	HR foam 35 kg/m ³
Back cushions:	Bi-density HR foam 30 - 21 kg/m ³ . Back in varnished metal with epoxy powder finish and special outdoor Dryfeel foam
Base:	Plastic with galvanized screws, anti-slip
Estructura:	Abeto macizo
Suspension:	Cinchas elásticas entrecruzadas
Interior cojines de asiento:	Espuma HR 35 kg/m ³
Interior cojines de respaldo:	Espuma bi-densidad HR 30 y 21 kg/m ³ , soporte respaldo en metal Interior barniz polvo epoxy y espuma especial exterior Dryfeel
Patas:	Plástica con tornillos galvanizados. Anti-deslizante

OBSERVATIONS / OBSERVATIONS / OBSERVACIONES :

- Fabrication Européenne
- Entièrement déshabillable
- Traité pour utilisation outdoor: structure interne protégée par polyuréthane imperméable, agrafes acier inox, toile de fond nylon
- Modèle uniquement réalisable en tissus hydrofuges (qui ne laissent pas passer l'eau)
- Coussins de dossier librement positionnables sur les éléments
- Manufactured in Europe
- Entirely removable covers
- Treated for outdoor use: internal structure protected by waterproof polyurethane, staples in stainless steel, bottom cover in nylon
- Model only achievable in water-repellent fabrics (which do not let water through)
- Backrests can be positioned freely on the elements
- Fabricación europea
- Totalmente desfundable
- Modelo solo alcanzable en tejidos hidrófugos (que no dejan pasar el agua)
- Tratado para uso exterior: estructura interna protegida por poliuretano impermeable, grapas acero inox, tela de fondo nylon
- Los cojines de respaldo se pueden poner libremente sobre los elementos

OPTIONS / OPTIONAL / OPCIONES :

- Eléments disponibles dans 2 Profondeurs : P.118 cm et P.98 cm
- Elements available in 2 Depths: D.118 cm and D.98 cm
- Elementos disponibles en 2 Profundidades: P.118 cm y P.98 cm

NOTICE D'UTILISATION DES TISSUS / INFORMATION REGARDING USE OF FABRICS / INFORMACIÓN DEL USO DE LAS TELAS

1) Sens de coupe des tissus / Direction of the cut / Sentido del corte de las telas:

Tous les tissus utilisés pour la fabrication du modèle ESCAPADE OUTDOOR sont coupés dans le sens de la longueur des pièces de tissu, comme indiqué ci-dessous :

All fabrics used on the ESCAPADE OUTDOOR sofa are cut lengthwise, as shown below:

Todas las telas utilizadas para la fabricación del modelo ESCAPADE OUTDOOR se cortan en el sentido largo de las piezas de tela, como indicado más abajo:

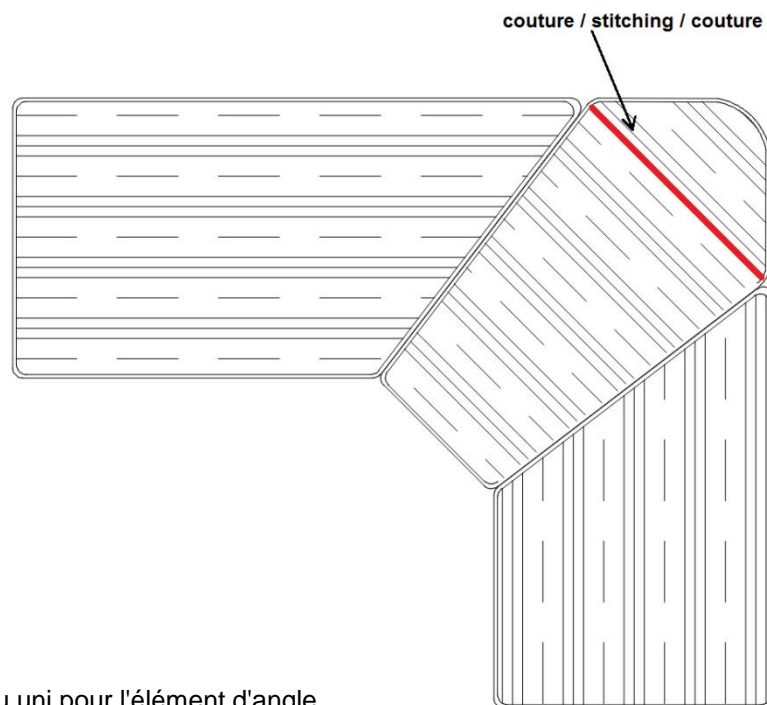

design Zeno NUGARI

2) Particularité de l'élément d'angle / Distinctive feature of the corner element / Particularidad del elemento de ángulo:

La Profondeur de l'élément d'angle étant supérieure à la laize des tissus, il est obligatoire de l'habiller avec 2 morceaux de tissus différents cousus ensemble. Il est impossible de les raccorder entre eux.

The depth of the corner element is superior to the width of the fabrics used. It is therefore necessary to upholster it with two different pieces of fabrics sewed together. It is not possible to have them match.

La profundidad del elemento de ángulo como es superior al ancho de las telas, es obligatorio ponerle 2 trozos de telas diferentes cosidos juntos. Es imposible casarlas entre ellas.

Pour cette raison, nous vous conseillons de toujours utiliser un tissu uni pour l'élément d'angle.

This is the reason why we recommend that you always use a plain fabric for the corner element.

Por esta razón, les aconsejamos que siempre utilicen una tela lisa para el elemento de ángulo.

ESCAPADE OUTDOOR

design Zeno NUGARI

Par ailleurs, il est impossible de raccorder les tissus entre les 2 éléments à pans coupés

It is also not possible to match fabrics between the 2 angled cut elements

Por otra parte, es imposible casar las telas entre 2 elementos recortados.

3) Revêtements déconseillés / Recommended materials / Revestimientos desaconejados:

L'utilisation de tissus à poils longs n'est pas conseillée. En effet, le frottement de l'antidérapant placé sous le support des coussins de dos pourrait, à la longue, détériorer ces tissus.

The use of fabrics with long pile (such as faux-fur, shaggy materials) is not recommended. These materials will cause friction with the nonskid product used under the support of the back cushions and it may deteriorate them over time.

El uso de tela con pelos largos, no es aconsejable. La fricción del anti-deslizante puesto bajo el soporte de los cojines de respaldo podría, a la larga, deteriorar estas telas.
