design Daniel RODE

Sur le principe des avions de chasse échappant aux radars, Daniel Rode a dessiné Furtif pour tenter d'échapper aux lois de la pesanteur par la prouesse d'un porte-à-faux spectaculaire et l'élégance prismatique de formes triangulées.

Inspired by the idea of fighter planes escaping from radars, Daniel Rode designed the Furtif to try to escape from the laws of gravity. It features a spectacular overhang and an elegant prismatic base with triangular shapes.

Sobre el principio de los aviones de caza escapando a los radares, Daniel Rode ha diseñado Furtif para intentar escapar a las leyes de la gravedad por la proeza de un voladizo espectacular y la elegancia prismática de las formas triangulares.
